

HUMAN RESOURCES RISK MANAGEMENT IDENTIFYING AND MINIMIZING RISKS

The world of work is constantly changing. Digitalization, economic developments and the accompanying internal changes result in increased strain upon employees.

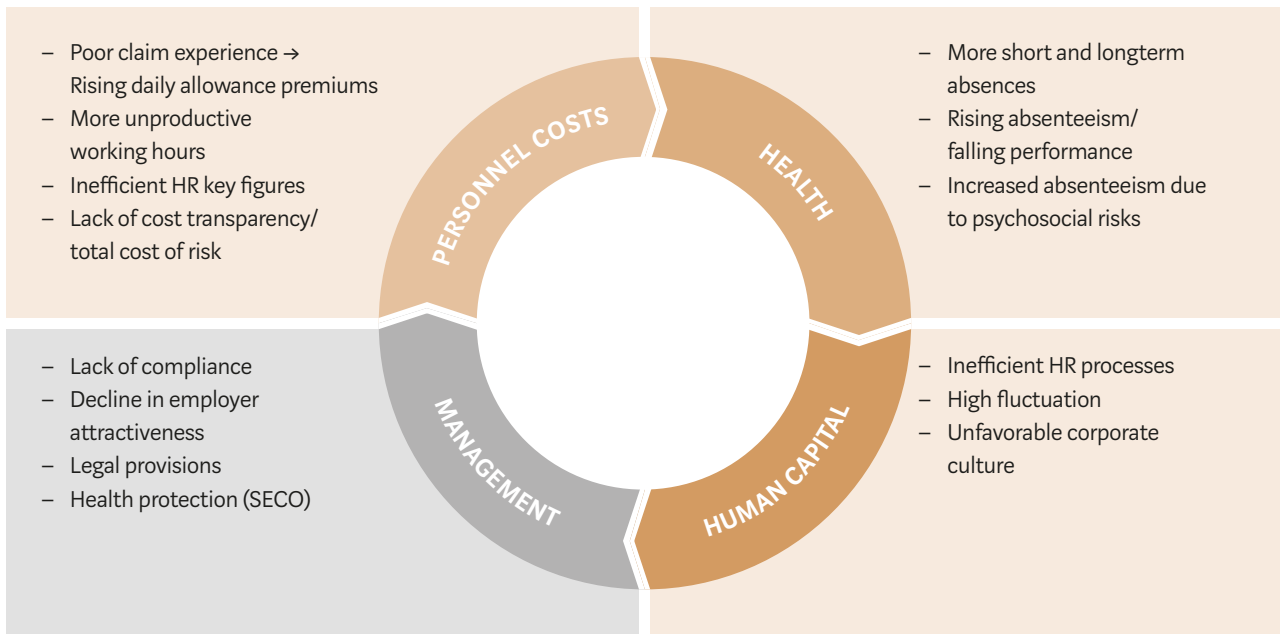

CHANGE INVOLVES RISKS

Continuous changes place high demands on employees and managers. New forms of stress which impact absence, productivity and performance are increasingly leading to time off work and physical and mental health problems.

This not only leads to direct costs such as continued salary payments, higher daily sickness benefit premiums and pension fund provisions, but also indirect costs such as overtime, increased levels of absence and the loss of expertise.

It follows that a balance must be found between efficiency improvement, performance optimization and overloading. With company-specific analysis, ergonomic findings and our many years of consulting experience, we help our customers to overcome these challenges.
